

## Volunteers needed!

The seventh annual **Chain Reaction Contraption Contest** (formerly the **Rube Goldberg Machine Contest**) will be held as the inaugural event for the 2008 National Engineers' Week in Pittsburgh. The contest is a spirited competition for students in grades 9-12 that fosters an interest in engineering by challenging students to create a machine that will accomplish a specific task using a series of convoluted steps. This year's task is to **Draw and Erase an "X" in 20 steps or more.**

Volunteer judges are needed for the morning of  
Friday, December 7, 2007  
at the Carnegie Science Center.

Food and admission to the Carnegie Science Center is provided to all volunteers.

Mentors are also needed to advise local teams in their machine's construction from now through December 7.

If you are interested in volunteering or want more information, please contact **Chris Savinda of Westinghouse Electric Company** at 412-374-2785 or at [savindc@westinghouse.com](mailto:savindc@westinghouse.com). More information on the contest can also be found at <http://www.chainreactioncontest.org/>.
