

A Joint Tour Meeting with ASME /ASM

Oct 12, 2004 6:15pm at Kionix, Inc

Dinner to follow 7:30pm. (\$15)

Please RSVP lisa@imrtest.com by Oct 8th.

With dinner choice. Top sirloin filet, Grilled Duck, Stuffed Shrimp, or Vegetarian

Kionix, Inc. was founded in 1993 to bring Micro-Electro-Mechanical Systems (MEMS) technology, developed by Cornell University's Nanofabrication Facility, into large-scale commercial production.

Kionix applies the best practices of the IC semiconductor business and uses industry-standard fabrication equipment and techniques to construct three-dimensional, moving, silicon structures on the scale of modern microelectronics. The Company utilizes a deep-silicon, next-generation, proprietary MEMS technology known as plasma micromachining for its high-volume production. This technology platform enables Kionix to produce MEMS products whose performance and manufacturing cost are unmatched by any others in the industry.
